

switchio

Switch to **Switchio** and enjoy the ease, security and savings of cashless cEMV ticketing in public transport.

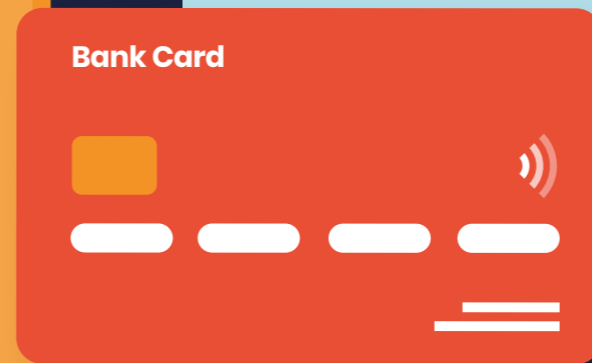

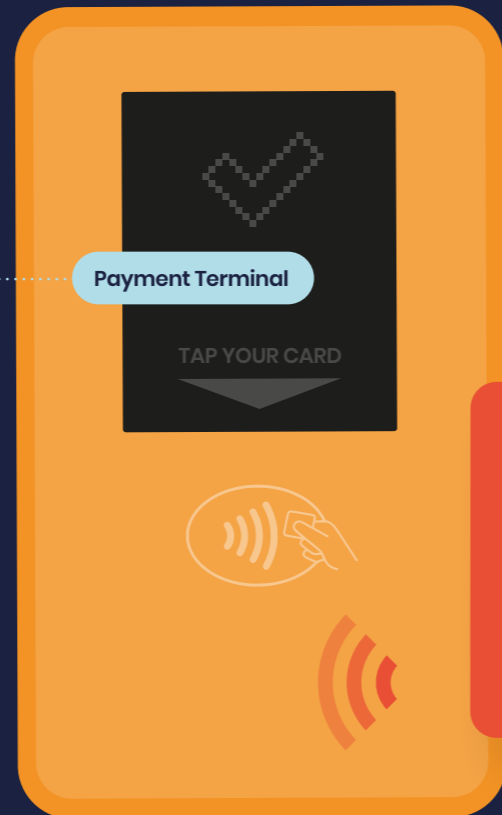

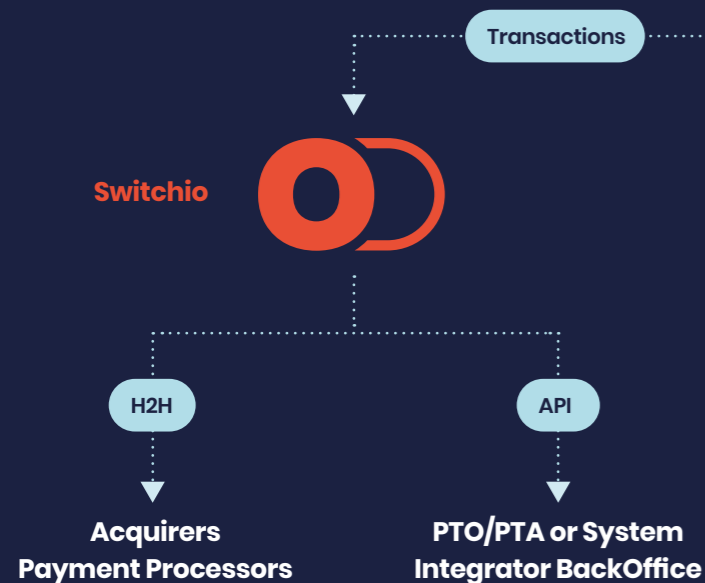

Transport

solutions by **MONET +**

Switchio is a comprehensive Transit ticketing platform and payment gateway solution for cashless EMV/cEMV openloop ticketing in public transportation.

We help transport operators deliver a more comfortable public transport experience to their customers. Our platform results in significant cost savings and reduces an operator's environmental footprint.

Tap in. Tap out.

No need to purchase a paper ticket – just 'TAP' your NFC-bankcard or NFC-Wallet app 'and GO'.

Explore the Switchio advantage

Flexible payment platform that meets the needs of public transport operators

Modular solution designed to fit all card acceptance requirements

Low initial investment and fast roll-out

24/7 access to transaction information and data analytics

Uncompromised security of payment processing

Support for a wide range of hardware platforms and easy integration of new platforms

PRODATA P Excellence SAM

Seamless travel

Open-loop ticketing facilitates seamless travel across transport modes and geographic boundaries.

Savings for passengers

Our AFC technology automatically calculates the most optimal fare available to a passenger.

No paper ticket needed

Your encrypted credit/debit card number from your tapped NFC bankcard, smartphone or smart wearable becomes your valid and digital ticket.

Safe & comfortable

In a world touched by a global pandemic, contactless ticketing is preferred by most travellers.

Lower costs for operators

Open-loop transitticketing and fare collection leads to significant cost savings for transport operators.

Watch & Explore

Learn about the many ways public transport benefits from Switchio.

Worldwide

Cities across the globe are growing,

and with them the number of people using public transport. Increased demand for public transport requires intelligent solutions. Openloop transit ticketing is one such solution.
